43- 148

**Synthesis of Aminomethylated 4-Fluoropiperidines and 3-Fluoropyrrolidines.**

Key step of the title synthesis is the regioselective bromofluorination of methylenepiperidines and -pyrrolidines (I) with NBS and Et<sub>3</sub>N·3HF. Title compounds are pharmacologically interesting derivatives. — (VERNIEST, G.; PIRON, K.; VAN HENDE, E.; THURING, J. W.; MACDONALD, G.; DEROOSE, F.; DE KIMPE\*, N.; Org. Biomol.
